

MAY 22ND FIRST TIME LOGIN

We are excited! Our new internet banking service is getting closer every day. We will share our new site with you on May 22nd. There will be a few setup steps you will need to complete in order to login to your online banking for the first time.

1. Go to our homepage at www.communitybankmidwest.com
2. Find the login section and click "Internet Banking Login".
3. Use your existing login ID.
4. You will have a temporary password the first time you login.

Your temporary Password is your current login ID + last four of the SSN associated with your account. For example: If your current login ID is jdoe and your SSN is 123-45-6789, then your security code will be jdoe6789.

5. The system will then walk you through an initial registration process where you will setup a new Password as well as 3 security questions and answers. The system will also prompt you to verify or enter a valid email address. Your email address may be used for password resets, account alerts and institution communication.

We are delighted to bring you the latest in internet banking technology. Should you have any questions or concerns, please feel free to contact us.

Sincerely,

Community Bank
